Denpasar, Bali

An experienced Software Engineer with 3 years in software development, holding an educational background in Computer Science. Possesses strong technical skills in multiple frameworks and languages, particularly in JavaScript and PHP, with expertise in frameworks such as Laravel, ReactJS, NextJS, React Native, Express JS, and Vue JS. Skilled in managing SQL databases, testing, and source code management using tools like Git and version control systems. Adept at working with cross-disciplinary teams, utilizing development methodologies like Agile and Scrum to enhance efficiency and development quality.

Work Experiences

PT Pialang Asuransi Provis Mitra Sinergi - Jakarta, Indonesia   Mar 2022 - Present

Front End Developer

- Implement and develop systems using the React JS framework (slicing from design).
- Enhancing user experience (UX) by designing and implementing responsive designs that work well on various devices.
- Add features required by users, both from the operational and customer sides.
- Ensure that the system flow aligns with expectations.
- Control tasks on Trello.
- Collaborating with the backend team to integrate web services and APIs into the insurance applications.
- Creating technical documentation for the code and development processes used in projects.
- Participating in team meetings and brainstorming sessions to plan new features and improvements for the applications.
- Fixing bugs and issues reported by users or the Quality Assurance (QA) team.
- Conducting testing and debugging to ensure the applications run smoothly and are free from errors.

  Technical Environment: ReactJS, NextJs, MongoDB, ExpressJs, Git Control (GitLab)

PT Inti Prima Mandiri Utama (iPaymu) - Denpasar, Bali   Mar 2021 - Mar 2022

Full Stack Developer

- Develop (add features, debug, maintain) systems primarily using the Laravel framework.
- Conduct daily scrums on JIRA.
- Integrate with other ecosystems to ensure functional connectivity based on requests from operations or customers.
- Developing User Interfaces (UI): Creating and maintaining intuitive and responsive user interfaces for admin dashboards, transaction reports, and payment pages.
- Testing and Debugging: Writing and executing unit tests, integration tests, and end-to-end tests to ensure system functionality and reliability.
- Interacting with Other Teams: Collaborating with product, design, and operations teams to identify business and technical requirements and develop appropriate solutions.
- Providing Technical Support: Assisting in resolving technical issues that arise for both internal and external users.
- Monitoring System Performance: Using monitoring and logging tools such as Elasticsearch (Kibana) to track system health, detect anomalies, and improve application performance.
  Technical Environment: Laravel, PostgreSQL, AWS, GCP, Git Control (Gitlab)

Education Level

Institute Technology & Business STIKOM BALI - Denpasar, Bali   Sep 2016 - Mar 2020
Bachelor Degree in Computer Science, 3.77/4.00

Skills, Achievements & Other Experience

Frameworks: Laravel, ReactJS, NextJs, React Native, NodeJs, ExpressJs, HTML5, CSS

CSS Framework: Tailwind CSS, Bootstrap, Material-UI, Shadcn/UI, antDesign.

Database: MySQL, PostgreSQL, MongoDB, Prisma, Convex

Cloud Storage: Supabase, DigitalOcean.

Tools: Redux (State Management), axios (API integration).
